

KRANKZ CONNECT

Changing the way we connect and interact with the world

The “Connect ” Keyboard

Changing the Entertainment Playing Field

The Connect Keyboard is a Wireless Interactive Entertainment Keyboard designed to bring the ease of a full-size keyboard to your Smart TVs, Smart Devices, Amazon Fire Stick TV, Apple TV and Home Theater Systems. Its sleek design, backlit keys, function and controller buttons makes it the perfect fit for your living room and or home theater center. We designed the Connect keyboard with style and function in mind, from the curved ergonomic key layout, to the touch pad that lets you move the pointer with your finger, and the well positioned remote control and preprogrammed app function buttons.

The stylish Connect keyboard looks great and feels right at home whether you are using it with your Smart TV or your high-end Home Media Center.

Accessing all the Smart TV and Media Center features has never been this simple or easy.

Always know your exercise situation and adjust your exercise plan

Emergency “HELP ME” function.

The “HELP ME” feature is built-in to everyone of our wearable devices to notify whatever emergency service or services you may need, 911, Life Alert, and a special child alert feature.

When the “HELP ME” feature is activated and programmed in the Connect App it will allow the user to either activate it by voice or tap the face of the watch 3 time rapidly to call for help. Once activated the watch will display “HELP ME” on the screen or SoS to be more discreet in child mode.

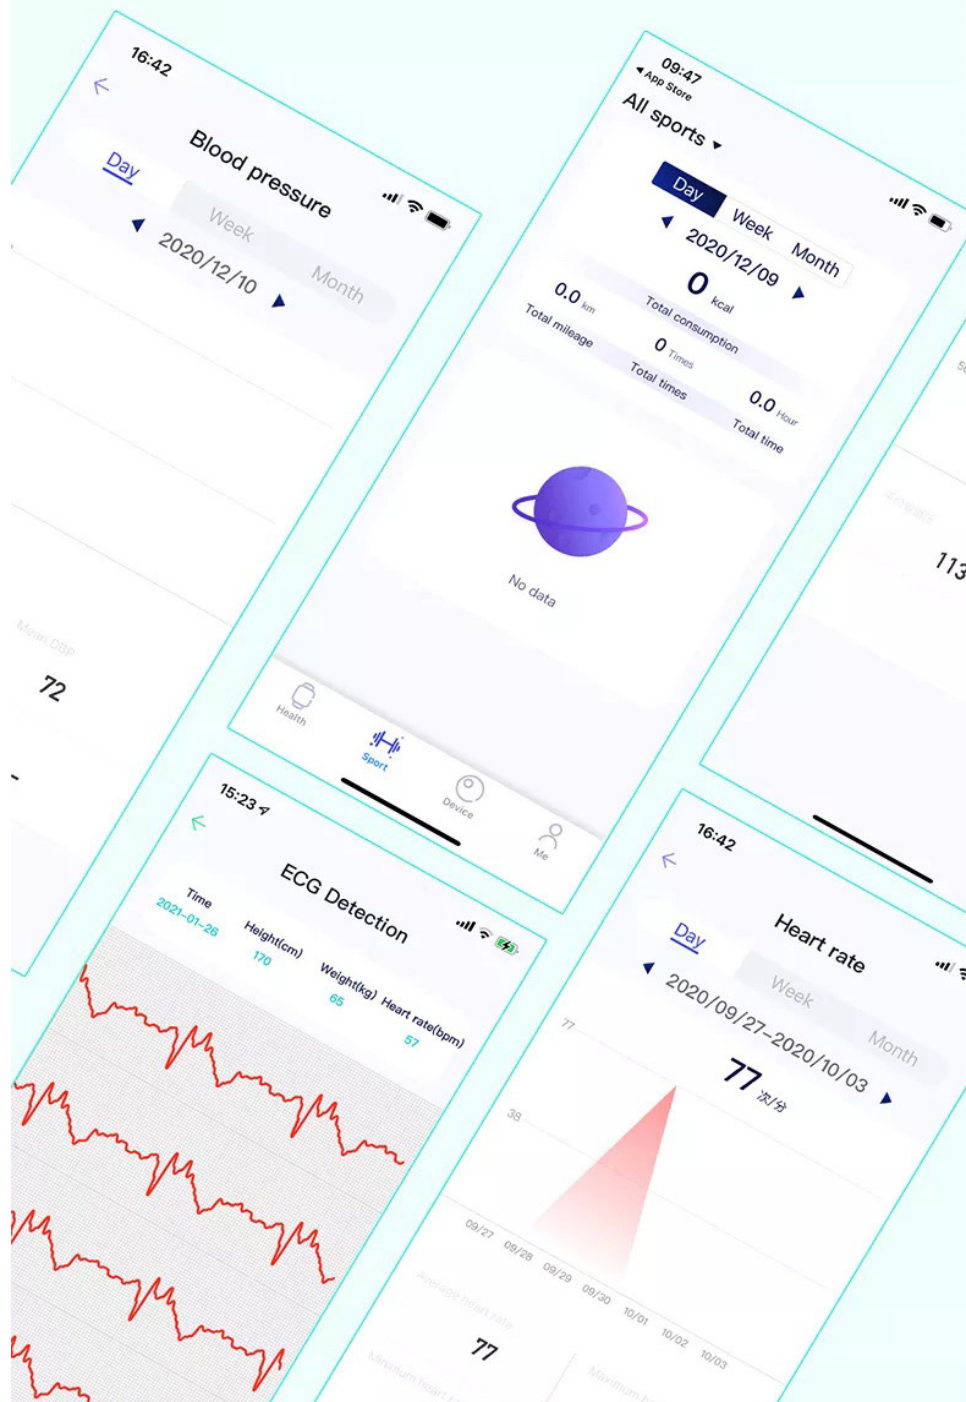

For children when activated it will notify their parents with the GPS locaction and they will be able to track them in realtime. The child setting can also be setup to contact the 911 and Police to assit in tracking in case of an abduction.

Location and tracking signal can be broadcast via, WiFi, Bluetooth, and Cellular.

A powerful watch needs a powerful APP

Connect APP is an all-weather health management platform. It can also record various sports, physical status and other data, and support to check at any time. Look at professional data and analyze your body data by analyzing multiple data sources.
